Profile

Experienced and versatile Web Developer with a proven track record in front-end web development. Skilled in designing, developing, and maintaining responsive and user-friendly websites, seamlessly blending technical expertise with creative problem-solving.

Proficient in collaborating with cross-functional teams to deliver high-quality, innovative solutions that meet user needs. Dedicated to writing clean, maintainable code and implementing modern web technologies to enhance application performance and scalability.

Passionate about current with emerging trends in web development, continuously improving skills in frameworks, tools, and best practices. Seeking a front-end development role to contribute expertise while expanding technical and creative capabilities.

Skills

HTML5 • CSS3 • ES6 JavaScript • API integrations • Bootstrap • Responsive Design • Tailwindcss • Material UI • Bulma • Styled Components • React.js • Next.js • Redux • Redux toolkit • Express.js • Supabase • Mongoose • MongoDB • Node.js • GitHub • Package managers • Figma • Module bundlers • Web performance optimization • Browser developer tools • Agile methodology • Project Management • Excellent Client Communication • Professionalism • Problem Solving • Time Management • Good Interpersonal Skills • Team collaboration • Critical thinking • Team collaboration • Creativity

Professional Experience

Fullstack Web Developer

Corley Integrated

July 2025 – present

New York

- Developed paralegal platform with React.js and Supabase.
- Engineered authentication system using email and OAuth, with role-based access control.

- Created admin dashboard for managing documents and forms.
- Built secure file upload feature with client-specific access controls.
- Optimized performance, resulting in 50% faster load times.
- Implemented job tracking system with real-time notifications.
- Reduced UI inconsistencies by 40% through a reusable design system.
- Implemented a livechat bot which connects users to a live agent.
- Technologies: React, Supabase, PostgreSQL, Tailwind CSS, Node.js.

Fullstack Web Developer

Freelance

November 2024 –
July 2025
Nigeria

- Completed over 100 hours of advanced training in React, Node.js, and database architecture.
- Built fullstack applications, including a legal document management system using React and Supabase.
- Delivered responsive, production-ready web apps for 3 freelance clients using modern tech stacks.
- Contributed to open-source projects by resolving bugs and enhancing documentation.
- Implemented CI/CD pipelines for freelance projects with GitHub Actions.

Frontend web developer

Octahedron software

August 2023 –
November 2024
Nigeria

- Designed and implemented responsive web interfaces to enhance user accessibility and experience across multiple devices.
- Built scalable and maintainable applications using React, adhering to best practices in component-based architecture.
- Integrated RESTful APIs to enable dynamic content updates and seamless data retrieval for client applications.
- Optimized web application performance by implementing lazy loading, code splitting, and asset compression.
- Ensured cross-browser compatibility, delivering consistent functionality and appearance across major browsers.
- Delivered accessible web applications by implementing WCAG standards to meet diverse user needs.
- Collaborated with cross-functional teams using Git and GitHub to manage version control and streamline workflows.
- Developed and maintained reusable components to ensure consistency and reduce development time.

- Participated in design discussions, provided technical insights, and implemented feedback to achieve project objectives.
- Diagnosed and resolved UI/UX issues, improving usability and overall user satisfaction.
- Utilized JavaScript libraries and frameworks to enhance application functionality and improve development efficiency.
- Implemented responsive design principles to ensure seamless user experiences across various devices and screen sizes.
- Conducted code reviews and provided constructive feedback to team members to improve overall code quality.
- Stayed up-to-date with industry trends and emerging technologies to continuously improve skills and knowledge.

Frontend web developer

Techpem plc

June 2022 – July 2023
Nigeria

- Designed and implemented responsive web interfaces, ensuring seamless user experiences across devices, from desktops to mobile phones.
- Developed scalable and dynamic web applications using React, leveraging reusable components for efficient development workflows.
- Integrated frontend applications with RESTful APIs, ensuring efficient data fetching and smooth client-server communication.
- Improved application performance by optimizing assets, implementing lazy loading, and reducing page load times.
- Collaborated with designers and backend developers, ensuring alignment between user interface designs and functional requirements.
- Adhered to WCAG standards to deliver accessible web applications, creating inclusive user experiences for all audiences.
- Conducted cross-browser testing and debugging, ensuring consistent functionality and visual appeal across major web browsers.
- Managed and maintained codebases using Git and GitHub, collaborating effectively with team members to resolve merge conflicts and track progress.
- Created interactive UI components such as modals, carousels, and dropdowns, enhancing user engagement.
- Documented code and workflows, simplifying onboarding for new developers and ensuring maintainable code quality.
- Implemented form validation and user feedback mechanisms, improving input accuracy and overall usability of the application.

Frontend Web Developer

Freelance

July 2021 – May 2022

Nigeria

- Collaborated with clients to understand project requirements and deliver tailored solutions.
- Implemented responsive design principles to enhance user experience.
- Applied UI/UX design principles to create visually appealing and intuitive user interfaces.
- Conducted thorough testing and debugging to ensure the functionality and performance of web applications.
- Conducted regular website updates, troubleshooting issues. and optimizing performance.
- Implemented version control using Git, facilitating efficient code management and collaboration.
- Ensured cross-browser compatibility and responsiveness for optimal user experience.
- Worked remotely, demonstrating strong self-motivation and time management skills.

Certificates

Udemy

The web developer bootcamp by
Colt Steele

Udemy

The Ultimate React Course by Jonas Schmedtmann

Education

Master of Science in Crop Physiology and Farming Systems

2022 – 2024

University of Benin

Bachelor of Science in Crop Science

2012 – 2017

University of Benin

Benin, Nigeria
