👤 Profile

Frontend-focused Fullstack Developer with experience building production-ready web applications using React, Next.js, Supabase, and Node.js. Skilled in authentication systems, dashboard development, API integration, deployment workflows, and performance optimization. Experienced in collaborating with teams and delivering responsive applications for client and internal business use.

🧠 Skills

Frontend development: React.js | Next.js | JavaScript (ES6+) | HTML5 | CSS3 | Tailwind CSS | Redux Toolkit | React Query | Bootstrap | Styled components

Backend development: Node.js | Express.js | Supabase | MongoDB | PostgreSQL | Mongoose

Tools & Deployment: GitHub | Plesk | DNS Management | SSL/TLS Configuration | Deployment | Package Managers | Cloudinary

Web Development: REST APIs | Authentication & Authorization | Responsive Design | Performance Optimization | Cross-Browser Compatibility

📁 Professional Experience

June 2025 – present
New York, USA (Remote)

Corley Integrated

Fullstack Web Developer

- Built and maintained production-ready web applications using React, Supabase, Node.js, and Tailwind CSS.
- Implemented authentication workflows including account registration, login, session handling, and role-based access control.
- Developed admin dashboards for managing documents, forms, users, and platform activity with secure role-based workflows.
- Built secure file upload systems with client-specific access permissions and protected content workflows.
- Implemented chatbot-to-live-agent escalation features and real-time notification systems.
- Managed deployment workflows, server migrations, DNS configurations, and SSL/TLS setup using Plesk and IONOS.
- Diagnosed and resolved production issues including mail delivery failures, environment configuration problems, and deployment errors.

November 2024 –
June 2025
Nigeria

Freelance

Fullstack Web Developer

- Built fullstack applications, including a legal document management system using React and Supabase.
- Delivered responsive, production-ready web apps for 3+ freelance clients using modern tech stacks.
- Contributed to open-source projects by resolving bugs and improving documentation.
- Completed over 100 hours of advanced training on React, Node.js, and database architecture.

August 2023 –
November 2024
Nigeria

Octahedron Software

Frontend Web Developer

- Built scalable and maintainable applications using React, adhering to best practices in component-based architecture.
- Integrated RESTful APIs to support dynamic content rendering and real-time data retrieval.
- Improved frontend performance through lazy loading, code splitting, and asset optimization.
- Implemented accessible and mobile-responsive interfaces aligned with WCAG standards.
- Collaborated with cross-functional teams using GitHub to manage version control and streamline workflows.
- Developed and maintained reusable components to ensure consistency and reduce development time.

- Participated in code reviews, debugging, and technical discussions to improve application quality.

June 2022 – July 2023
Nigeria

Techpem PLC

Frontend Web Developer

- Developed responsive frontend interfaces using React and reusable component architecture.
- Integrated frontend applications with RESTful APIs to support efficient client-server communication.
- Optimized application performance using lazy loading, asset compression, and responsive rendering techniques.
- Conducted cross-browser testing and debugging to maintain consistent user experience across devices.
- Collaborated with designers and backend developers to implement functional and visually consistent interfaces.
- Implemented form validation and user feedback systems to improve usability and data accuracy.

July 2021 – May 2022
Nigeria

Freelance

Frontend Web Developer

- Built responsive websites and frontend interfaces tailored to client requirements.
- Applied UI/UX principles to improve usability, layout consistency, and user engagement.
- Performed testing, debugging, and cross-browser optimization to improve application reliability.
- Conducted website maintenance, performance optimization, and content updates for client projects.
- Implemented version control workflows using GitHub.

Projects

SpiffyFox - Multi-Service Booking Platform

Role-based service-booking platform with contractor/client workflows, analytics dashboards, protected routes, and deployment management.

Corley.legal - Legal Services Platform

Legal services platform featuring admin dashboards, chatbot-to-live-agent workflows, secure document handling, and real-time content management.

JiffyFox - Task & Service Management Platform

Task and service-booking application with analytics dashboards, real-time syncing, drag-and-drop workflows, and responsive UI architecture.

Rate-It - Beauty Product Review Platform

Beauty product review platform with custom API integration, product bookmarking, real-time pricing, and optimized media handling.

Certificates

The Web Developer Bootcamp

Colt Steele (2023)

The Ultimate React

Jonas Schmedtmann (2024)

Education

2022 – 2024
Benin, Nigeria

Master of Science in Crop Physiology and Farming Systems

University of Benin

2012 – 2017
Benin, Nigeria

Bachelor of Science in Crop Science

University of Benin
